I. INTRODUCTION

The Assembly Standing Committee on Local Governments considers the legislative needs of New York State's local governments, including counties, cities, towns, villages, school districts, fire districts, and various other special districts and local agencies. The Committee monitors the needs of local governments and strives to develop legislative remedies to meet those needs. The Committee also explores new proposals and ideas that will enable local governments to better serve the citizens of New York State. The Committee endeavors to see the enactment of laws that will further improve local governments' abilities to address their unique problems. The Committee is also interested in assisting local governments by considering legislation that will provide flexibility in municipal finances and consider other legislative solutions to help local governments remain financially solvent.

The Committee considers legislation that proposes to amend the General Municipal, Municipal Home Rule, Local Finance, County, Town, Village, Volunteer Firefighters' Benefit, and Volunteer Ambulance Workers' Benefit Laws. Since the structure, powers and scope of local governments is broad, the Committee's concerns cover a wide range of issues. Home Rule legislation is also addressed. These bills deal with issues specific to a certain local government's jurisdiction and are intended to remedy a specific local concern. Through the use of home rule legislation to solve individual local needs, the Committee has helped resolve many unique situations and has enabled local governments all over the State to serve their citizens better.

II. PUBLIC HEARINGS

Local Governments and Cities Budget Implementation Hearing

On October 22, 2015, the Committee, along with the Committee on Cities, held its annual budget implementation hearing. The purpose of this hearing was to examine the implementation of Chapter 67 of the Laws of 2013, which created the Financial Restructuring Board for Local Governments. The State Budget for Fiscal Year 2015-2016 included an allocation of \$40 million for such Board to use for awards to local governments who apply and agree to follow the Board's recommendations. The committees examined how the Financial Restructuring Board for Local Governments has affected municipalities that have received assistance, as well as why some municipalities have not submitted requests, or have withdrawn such requests.

Ride- and Car- Ridesharing Roundtables

On October 19th in New York City and on October 21st in Albany, the Committee, along with the Committees on Insurance, Transportation and Cities, held two roundtables to discuss important issues related to ride- and car- ridesharing services. Ride- and car-sharing services, which provide access to transportation via smart-phone applications, are emerging industries in New York State. However, these services have been unevenly regulated unlike other existing transportation services that are operating under government regulations. Questions have been raised concerning these new business models regarding liability issues and consumer protections as well as the extent to which such services should be regulated at the state and local level. The participants discussed important issues related to local regulation of these industries, insurance coverage for drivers and passengers, and, access to these services for people with disabilities.

III. MAJOR ISSUES AND LEGISLATION OF 2015

A. LOCAL GOVERNMENT AID – ENACTED BUDGET

The State Budget for the State Fiscal year 2015-2016 continues funding for local governments in the form of unrestricted aid and grants to help local governments achieve efficiencies and share services.

IV. PARKLAND ALIENATION LEGISLATION

The issue of parkland alienation, or the conversion of parkland for other purposes, has been a great concern to the Committee. As a matter of public trust, it is a requirement that any use of public parkland for non-parkland purposes must be authorized by the New York State Legislature.

As part of the Committee's ongoing effort to protect the public trust as it relates to parkland and in keeping with the Assembly's policy of preserving open space, the Committee strives to ensure that each proposed alienation of parkland complies with alienation guidelines prior to it being reported out of Committee.

Committee guidelines for authorizing parkland alienation include specifying the number of acres proposed for alienation and requiring that the fair market value of such lands be dedicated for the purchase of replacement parkland of equal or greater fair market value or for capital improvement of existing parkland. The legislation must also include a legal description of the parkland proposed to be alienated, as well as language detailing any land proposed to be dedicated (if replacement land is proposed for parkland). Finally, a home rule message from the municipality requesting alienation is required prior to the Committee acting on any parkland legislation.

VI. OUTLOOK FOR 2016

The Committee recognizes the difficult economic outlook that the municipalities and citizens of New York have faced and will continue to face in the year to come. The Committee will build on the successes of the 2015 legislative session and continue to find ways to achieve savings for local governments, as well as explore other ways to reduce the cost of government in New York State.

In addition, the Committee will take an active role in examining the immediate need for meaningful relief for our struggling municipalities, including participating in and monitoring the work of the Financial Restructuring Board for Local Governments. The rising costs of public pensions, Medicaid, education, Early Intervention, correctional services, public safety, highway and transportation services, and social services (to name a few) must be addressed. The Committee will try to help lessen the burden placed on local governments.

The Committee will also continue to advocate for the fair and equitable distribution of local government aid. Local governments rely on a stable and predictable revenue stream from the State, which is also a critical aspect to forming balanced local budgets.

The Committee also plans to continue to examine the role that industrial development agencies and other local economic development agencies play in New York State's economic development. The Committee is interested in ensuring that these local agencies are transparent and accountable, with records that are easy to obtain and to understand, that they are creating good jobs, and that they are providing a decent return on the taxpayer funded investments being made. The Committee will continue to examine legislative options to address these concerns.

The Committee will also continue to address the needs of municipalities by examining home rule legislation in 2016 in order to ensure the enactment of home rule bills that provide communities with a remedy to their locally specific situations.

The Assembly Standing Committee on Local Governments looks forward to continuing to work with the Governor, the Senate, the State Comptroller, the Attorney General, and all local governments to improve the outlook for municipalities going forward.
