

Assemblyman Michael J. Cusick

Dear Neighbor,

Young children should not use summer vacation as an excuse to be inactive both physically and mentally. Studies have shown that children who continue

to read during the summer perform better academically in the fall. It is also important for children to be physically active as part of a healthy lifestyle. To encourage children to exercise both their mind and body during the summer months, I have established the Total Fitness Challenge.

The Total Fitness Challenge is open to all students from kindergarten through eighth grade. Each child must read at least 30 minutes for 40 days, and perform as many physical activities as they want. The different physical activities are assigned varying point values, which count toward each student's total score. As a new component of the Total Fitness Challenge, we would like to invite parents to join the challenge as well. If you would like to be a part of our Parent-Child competition, please contact my office for a parent brochure. A Total Fitness Challenge Medal will be awarded to the 1st, 2nd and 3rd place top scorers from each grade as well as the top Parent-Child entry. A trophy will be given to the school having the most points and all participants in the challenge will receive a certificate.

Mark the enclosed calendar for each day in July and August that you and your child read together and exercise. If the child reads each day for 30 minutes, he or she will check that day. For each day the child exercises, they will mark the coordinating letter(s) for the activity or activities performed from the list. We also ask that parents initial each day's entry and total up all points for activities done. At the end of the summer, the completed calendars should be returned to my district office at 1911 Richmond Avenue, Staten Island, NY 10314. I will provide each participant with a *Total Fitness Challenge Certificate*.

Don't forget, another good source for reading materials is your local public library. I've also listed a series of physical activities as suggestions for your child to perform. If you prefer to use the internet to log your Total Fitness Challenge information you can do so on our website www.totalfitnesschallenge.org, sign up and login your information!

Thank you and have fun! Sincerely.

Let's Get Fit Together

Step 1: Move off the couch!

According to 2005 statistics compiled by the Youth Risk Behavior Surveillance System, which is part of the Centers for Disease Control, 37 percent of New York State youth self-reported that they did not participate in vigorous physical activity in three or more days out of seven. Further, 78 percent of New York State youth self-reported that they did not participate in moderate physical activity in five or more days out of seven. And almost 85 percent of New York State youth self-reported they did not have daily physical education. Studies also show preschool and childhood obesity is rising. Additional reports state that most overweight children have at least one major physiological risk factor, besides being overweight, and they are likely to have abnormally thick heart muscle tissues as adults, which increases the risk of heart attack and heart failure.

Step 2: Take action!

Getting active can help reduce these risks and we've listed some ideas for getting fit:
