Officials Activate Montgomery County Solar Garden

“As an engineer, I know firsthand how the latest clean-energy technology like this can benefit our communities in so many ways. Not only is this project reducing our community’s carbon footprint, it is saving the Fort Plain School District money that can be invested in our children’s future.”

–Assemblyman Angelo Santabarbara

Bringing new investments to Fort Plain

Invested nearly \$1 billion for NY-Sun, paving the way for large-scale solar projects like the village of Nelliston’s 200-kilowatt solar garden, soon to be expanded to 450 kilowatts

Delivered \$18 million for the Upstate Flood Recovery Program to repair and rebuild our communities

Saved taxpayers more than \$850,000 over the next two decades with solar investment and reduced the Fort Plain Central School District’s carbon footprint

Secured \$3 million to repair roads and bridges for Montgomery County – with direct aid to Fort Plain
