

5.15m H... ..

There are great men in history who feared for America's future, some due to corruption pertaining to our government, business, justice and academia and all of them due to radiation and nuclear power.

Those men include Albert Einstein, a known pacifist considered the greatest genius in history, Dr. Karl Z. Morgan known as the father of Nuclear Health Physics and Admiral Hyman Rickover considered the father of the Nuclear Navy.

Before I say anything else, I urge each of you to read a book - *The Report from Iron Mountain on the Possibility and Desirability of Peace*, published in 1967 by Dial Press and written by A Special Study Group - John Doe *or* Leonard C. Lewin. What was described in that report were plans that have come to pass and are culminating into a final plan of a World Government, not for real peace, but for world domination by a relative few using a sophisticated form of slavery to control the masses with deliberate global pollution and space exploration playing major roles. Eugenics was also part of the plan. Lewin claimed the report was the product of a secret government think tank authorized in August 1963. JFK was president at that time. The report was completed in 1966. According to reports, the book created an uproar in the White House and efforts to squash the book included Lewin's right to publish it if he hadn't written it. After years of maintaining its authenticity, in 1972, Lewin claimed he had written the book which has since been downplayed as a hoax or satire. Regardless of who you believe wrote the book, a think tank or a politically astute man - the plans put forth could be a blueprint for what has transpired since.

It is my concern that our Governor and President with the help of others, have effectively declared an unofficial war on their own people. A war involving economic, psychological, biological, chemical and radioactive warfare and a slide into fascism. The same is happening in a number of other countries simultaneously in what appears to be a conspiracy to create a world government which would effectively enslave the masses. Like a game of - I'll let you in to exploit my people and you let us into your country to exploit your people. Once in good luck getting them out. For the people of any country. It is for this reason that I ask that Cuomo's proposed budget and all recent changes to law and expenditures other than those needed to provide for the running of our government and *necessary* public programs - be put on hold, while my claims are investigated. Such a request may be extraordinary but due to the potentially catastrophic consequences of allowing such expenditures, changes and implementation of recently approved amendments to continue - upholding this request is not only reasonable but imperative if the people in our state and our country as well as the people of other countries are to be protected from a group of treasonous international business families with political strength but dangerously lacking in morality and compassion. **This group poses a threat of unprecedented proportion due to the involvement of massive mining (and use) of highly radioactive and toxic materials and rare earths as found in the shales, the mass propagation and use of genetically engineered microorganisms and the ability to alter climate and geological events.**

Radiation that can last for seconds to billions of years and invincible microbes that have the ability to completely alter our ecosystem, affect geology, destroy crops and cause unstoppable epidemics released into the environment. Nanotechnology increases the

hazards of toxic and radioactive materials by creating particles so tiny that they can cross the blood brain barrier and affect organs they could previously not travel to and be taken up by plants. **All in the name of so-called renewable, clean, green technology and protecting the people and the planet from global warming and climate change.**

This war consists of:

1) A psychological war using Hitlers knowledge of human psychology and tactics of mass persuasion improved upon by such institutions as Stanford's Persuasive Technology Institute to confuse, delude, defraud and coerce.

2) A biological, chemical and radioactive war making use of combinatorial science, toxic radioactive resources, genetic engineering and satellites to bring in a number of industries and countries all playing a role in making this possible.

3) An Economic War.

a) The deliberate creation of an economic crisis to make people vulnerable and accepting of the unacceptable.

b) The creation of an economic system bearing unpleasant resemblance to that of the Economics of Fascism as imposed by Nazi Germany and Special Economic Zones created in China and Mexico.

c) The vast investment of both current and future taxes, public and private lands and public retirement and union funds to finance and create complete dependence on toxic shale resources and genetic engineering controlled by a relatively small number of international businessmen/political families to create a form of financial Stockholmes Syndrome all under the guise of helping the people and global warming. International partnerships, foreign investment in our resources and grid and public/private partnerships creating obligations and liabilities that seal the deal in holding us hostage. Tolerance of the creation of massive Venture Capital firms, cartels, monopolies in direct conflict with the intent of our anti-trust laws. Allowing oligarchies to be created involving positions in government, non profits and education. Tolerance of an unethical alliance between government, education and 'charitable' businessmen. The training of our young to have complete and specific reliance on mining our shale resources.

An end goal, not of peace but of world domination and enslavement which may begin with financial enslavement but ends with enslavement via utter dependence on the very things that destroyed our health and environment, for survival. The same radiation, chemical, and biological weapons in the form of genetically modified organisms and the processes used to create them and to destroy our health and environment – ultimately needed to clean (as best it can) our water, air and soil and to heal illness or to create genetically modified plants and animals which may ultimately include humans, that can survive such contamination. Eugenics was included in the aforementioned book.

4) An international war with the enemy both on the inside and out working together.

“Make the lie big, make it simple, keep saying it, and eventually they will believe it”

“Through clever and constant application of propaganda, people can be made to see paradise as hell, and also the other way round, to consider the most wretched sort of life as paradise.” Adolf Hitler

“It would not be impossible to prove with sufficient repetition and a psychological understanding of the people concerned that a square is in fact a circle. They are mere words, and words can be molded until they clothe ideas and disguise.”

— Joseph Goebbels

- 1) The Global public has been convinced we must switch to ‘renewable’ ‘clean’ tech to save the planet from global warming and climate change. We are encouraged to envision the warmth of the sun and the wind and cars that don’t spew polluting smoke.
- 2) Clean tech relies on extremely dangerous and expensive mining of highly radioactive deposits containing rare earths and valued toxic gases like our shales.
- 3) Clean, Renewables are creating unprecedented demand for rare earths.
- 4) Genetically engineered microorganisms (GEM) are created to separate Rare Earths (REE) from each other and the radioactive elements they are bound to in a dangerous fermentation process.
- 5) These microorganisms are engineered to withstand extremes in acidity, radiation, heavy metal toxicity, toxic gases and native microbes that could harm them. They are also created to destroy native bacteria that have negative impacts on gas wells.
- 6) Microorganisms that could withstand such extremes were discovered in acid mine drainage. Microbes with no cell walls. Archaeobacteria.
- 7) Microorganisms – yeasts, bacteria, fungi, molds, phages (viruses) – have the ability to reproduce and evolve rapidly. They also have the ability to transfer DNA not only within their own but with other species for example a fungus to a yeast. Conditions can be created to induce this.
- 8) Cuomo is heavily promoting the fermentation industries in NYS – Yogurt, wine, beer and cheese. The waste products of these industries can be used as a substrate to mass produce the microbes desired by the mining industry for gas, rare earth, uranium and thorium processing.
- 9) It is my concern that these industries are also being used to bring in GEM and introduce them into the environment with an FDA loophole. Although I can’t yet prove it, I am greatly concerned that the conditions ripe for horizontal gene transfer are being created and the mass production of GEM in NY and elsewhere already begun with the help of new farm laws and grants.
 - a) GEM are now allowed in the fermentation industry to improve the fermentation process.
 - b) The filtration process filters out the DNA of the microbes into the waste

- c) Fermentation waste is sent to farms for feed, fertilizer and anaerobic digesters
- d) Cattle already being fed antibiotics are now being fed a yeast called *Saccharomyces Cerevisiae* supposedly to improve milk production. This yeast is known as a malleable microbe for genetic engineering.

There is more I could say but I am unfortunately out of time.
