

## **South Fork Gas Price Survey Released for July 11, 2017**

### ***Only 7 of 28 stations surveyed in East Hampton and Southampton are below the Long Island average***

New York State Assemblyman Fred W. Thiele, Jr. (I, D, WF-Sag Harbor) today released his gasoline price survey for July 11, 2017.

Of the stations surveyed in western Southampton, 4 of 10 were at or below the average for L.I. In eastern Southampton, 3 of 10 stations were at or below the L.I. average. In East Hampton, 0 of 8 stations were at or below the L.I. average. Currently, crude oil prices are \$46 in world markets; down from \$55 in the last survey in January. Local gas prices are the same or have decreased since January at 21 of 28 stations, reflecting the decrease in oil prices per barrel.

Thiele stated, “The price of gasoline in eastern Southampton ranges between \$2.27 and \$2.59 per gallon. In Southampton west of the Canal, the range is between \$2.35 and \$3.29. The range in East Hampton is between \$2.65 and \$3.19. In Southold the range is between \$2.39 and \$2.53. In Riverhead, the range is between \$2.22 and \$2.41. The Long Island average is \$2.43, the New York City average is \$2.57, and the State average is \$2.41.”

Thiele called upon the State Senate to pass his legislation (A.979) which would prohibit zone pricing. The legislation would enact the recommendations of the State Attorney General. The bill has been supported by local gasoline retailers and opposed by the major oil companies. The bill passed the State Assembly by a 130-15 margin on June 13, 2017 but continues to languish in the State Senate.

Thiele concluded. “There is no other conclusion to reach other than the fact that prices are fixed based on geography. For example, on the South Fork, gas prices are substantially higher than the rest of the Island; unrelated to the actual cost. This is unfair and should be illegal.”
