ENERGY COSTS ARE OUT OF CONTROL.³

Utility bills are skyrocketing², and families are paying the price.

Since 2019, electricity prices for residential customers in New York have risen by more than **58 percent**.⁵

A newly released memo from the New York State Energy Research and Development Authority confirms energy bills could increase **\$4,000 a year for upstate residents**, and gasoline prices are projected to increase by as much as **\$2.23 per gallon**.⁶

Assemblywoman Walsh's Real Plan To Lower Your Energy Bills. It would:

RETURN MONEY TO RATEPAYERS (A.8876-A)

Requires unused state energy funds to be returned to you as credit on your bill

PROTECT SCHOOLS & TAXPAYERS (A.2005)

Allows schools to opt out of the zero-emission bus mandate when it is not feasible

PROTECT ACCESS TO AFFORDABLE ENERGY (A.6796)

Prevents Albany from banning gas stoves and home heating systems

INCREASE TRANSPARENCY ON RATE HIKES (A.1270)

Requires utilities to clearly disclose rate hikes and available bill assistance programs

Assemblywoman Mary Beth Walsh is fighting to bring down rising energy costs and restore balance to New York's energy policies. Scan the QR code to hear more about the ongoing energy crisis in New York and her plan to fix this!
