# Repairing Our Streets and Maintaining our Community

*“ Maintaining our roads and infrastructure helps ensure the safety of our residents and has a positive impact on the quality of life in our Northside neighborhoods.”*

— Assemblyman Bill Magnarelli

- Assemblyman Magnarelli secured \$10 million in grant money to renovate roads and infrastructure in the city of Syracuse.
- Grant Boulevard was repaved and improved from Wheaton Road to Highland St. The renovations focused on road resurfacing, fixing the curbs and corners.
- Also, North Beech Street between Burnet Avenue and Hawley Avenue will have infrastructure reconstruction that will include replacement of sewer and water subsurface infrastructure.
- As the city renovates these areas, they will be enhancing the management systems by adding sensors for predictive maintenance of water, sewer and roads.

## **Butternut Street– Dig Once:**

- Butternut Street in Syracuse from Grant Boulevard to Hillside Street will be getting a makeover as part of the project.
- Due to COVID and the resulting pandemic, plans for reconstruction of local streets has been delayed.
- Planning has been completed and money has been earmarked for future renovations of certain streets on the Northside.

## **The project includes:**

- relocating the current island park in the center of “Butternut Circle” to the side to allow safer access
- replacing a 12-inch water line at no cost to property owners, adding a conduit for future broadband use, a full infrastructure replacement, five foot concrete sidewalks, new curbing and enhancing the intersection of Grant Blvd. and Butternut with a four way lighting system for safety and mobility.
