

In Western New York, One-Size-Fits-All Mandates *Don't Work.*

“Federal bill aimed to counter New York’s all-electric buildings mandate moves forward” -Spectrum News, 12/3/25⁴

“State law forces ‘all electric’ for ‘most new building’ construction in January 2026” -WGRZ, 7/25/25⁵

We know what real winters are like

My family and yours rely on natural gas and other traditional energy sources to keep our homes warm, our kitchens running, and our utility bills manageable. Albany's mandates will eventually force homes and businesses across New York to convert to all-electric systems.⁶

ASSEMBLYMAN
PAT CHLUDZINSKI

What does this mean?

Switching a home from gas or oil to fully electric appliances and heating can be expensive. Most homeowners could expect to spend anywhere from around **\$17,000 to \$30,000**¹

In freezing temperatures, **electric heat pumps struggle to perform**—putting families and seniors at risk during snowstorms and power outages.²

New York's electric grid isn't built to handle this kind of demand—especially in peak winter. That means we could face **blackouts** that experts say **could last months**.³

That's why I support:

Allow school buses to keep natural gas and propane as **available, affordable energy options**. (A.2005)

Slowing down state mandates to **give families time to adapt**. (A.5168)

Providing transparency on the wide-ranging impact the CLCPA will have on families and businesses. (A.5395)
